

Fernando Agustín Alfaro

Junior Full Stack Developer

alfarofernando@live.com · +54 9 11 5260-6455 · [GitHub](#) · [LinkedIn](#)

PROFILE

University Technician in Programming with professional experience in Java and Spring, Angular and TypeScript, SQL, and system integrations. Worked across financial, ERP, logistics, messaging, and internal platforms, including production support, performance work, and CI/CD.

TECHNICAL SKILLS

Professional experience: Java, Spring Boot, Angular, TypeScript, JavaScript, SQL, MySQL, MariaDB, REST, SOAP/XML/WSDL, Git, Linux, CI/CD, JWT, Nginx, Swagger/OpenAPI

Applied experience: React, React Native, Node.js/TypeScript, Docker, Firebase, Jest, JUnit/Mockito, WebSocket, SSE, Systemd, VPS

Training and complementary knowledge: Python, FastAPI, Django, PHP, Laravel, PostgreSQL, MongoDB, AWS, Kubernetes

PROFESSIONAL EXPERIENCE

NetOne / BarloventoTech · Software Developer (Tier 1 → Tier 2 Trainee)

December 2025 – September 25, 2026

- Implemented and maintained full-stack features across business products and Java services.
- Worked with Angular/TypeScript, SQL, REST/SOAP APIs, and external integrations.
- Resolved functional and production issues, reviewed queries, and improved workflows.
- Contributed to testing, code reviews, documentation, CI/CD, and Linux operations.

SELECTED PROJECTS AND CONTRIBUTIONS

Wise Capital / gFondos

Java, Angular 18, TypeScript, SQL, Firebase, REST, WebSocket

Full-stack contributions to a financial ecosystem for investments, accounts, and portfolio management. Implemented and maintained trading, account, transaction, and financial validation flows.

Netegia N4

Java, Angular, TypeScript, SQL, JPA/Hibernate, REST, Firebase, SSE

Evolution of a business management platform covering API migration, work orders, onboarding, and integrations. Contributed to the migration of public APIs from N3 to N4 and work order workflows.

BarloGOW / Wareg

Java, Angular 19, TypeScript, Evolution API, ARCA/AFIP, OCR, GitHub Actions

Collections, campaign, and messaging features integrating WhatsApp, OCR, and operational interfaces. Worked on WhatsApp linking, delivery states, and the Evolution API interaction engine.

MS GBP · ERP Middleware

Java 25, Spring Boot 3, SOAP, XML/WSDL, REST, MariaDB, JPA, JWT, OpenAPI

Java microservice connecting applications to ERP operations through REST APIs and SOAP services. Integrated query, authentication, product, pricing, and sales-order operations with SOAP/WSDL services.

MS Logistics · Zuiden

Java 25, Spring Boot, REST, SQL/JPA, JWT, Multi-tenant, Idempotency

Logistics integration for catalog, order lookups, and shipping status through REST services. Worked on endpoints for products, availability, orders, shipments, and tenant configuration.

Notifications Microservice

Node.js, TypeScript, Firebase, Docker, Jest, GitLab CI, Swagger

Messaging and push notification service using Firebase, with failure-focused delivery traceability. Added traceability for push deliveries and limited it to relevant failure cases.

AFIPMS · Tax Services

Java, Maven, SOAP, SQL, AFIP/ARCA, XML

Maintenance of Java services integrated with AFIP SOAP tax APIs. Worked on AFIP status queries and tax information persistence.

Rendición · Legacy Application

Java, Maven, WAR, SQL, XML, PowerShell, Windows scripts

Operational maintenance tasks for a Java WAR application while preserving existing behavior. Prepared build and operational guidance and scripts.

Shared Components

Java, Maven, SQL, UTF-8, Shared libraries

Maintenance of a Java/Maven library shared by business applications. Adjusted a status selector to preserve the expected legacy styling.

Intranet · Scoped Work

Java, Maven, JSP, JavaScript, SQL, HTML/CSS

Limited exposure to an internal Java/JSP web application and its legacy resources. Participated in initial configuration tasks.

AdroqueBus / Fonobus

React Native, Java, MySQL, Power BI exports, Performance analysis

Support and functional improvements for a transit application and its management tools. Worked on statuses, filters, and exports for reporting and Power BI.

Evolution API · WhatsApp Operations

Evolution API, Node.js, Linux, TLS, VPS, WhatsApp

Operational troubleshooting of instances, certificates, and delivery states in WhatsApp integrations. Investigated connectivity, QR/code linking, and actual delivery status.

CVGenio

React 19, TypeScript, Vite, AI APIs, VPS, Product design

Personal product for creating and analyzing résumés with AI-assisted workflows. Built workflows for uploading and processing résumés and job descriptions.

Portal SGU · Urban Guard

Java 21, Angular 17, MySQL 8, Ubuntu, Nginx, JWT, Audit

Web system for managing personnel, attendance, shift sheets, and operational statistics. Implemented modules for users, roles, vehicles, personnel, periods, and attendance.

Alfa:dev

Software development, Product exploration, Freelance

Independent initiative bringing together personal projects, freelance software development, and product exploration. Built and maintained personal products at different stages.

ENGINEERING PRACTICE

- REST and SOAP/XML integrations across financial and ERP systems, AFIP/ARCA, logistics, Firebase, and WhatsApp messaging.
- Production debugging and support, SQL queries, N+1 issues, pagination, idempotency, JWT authentication, and external error handling.
- Testing and QA, code reviews, technical documentation, Git, CI/CD, Linux, Docker, Nginx, and deployments.
- Use of Codex/ChatGPT to explore codebases, plan, debug, refactor, and document, with human code review and behavior validation.

EDUCATION

University Technician in Programming — National Technological University, Avellaneda Regional Faculty · 2023–2025

Full Stack MERN Program — National Technological University, Villa María Regional Faculty · 2024

LANGUAGES

B1 / Intermediate: technical documentation reading and written communication; prepared spoken communication.
